Uncertainty and loss in maternity and neonatal care

supporting **parents**
through the **challenges**

About the conference

Every day in the UK, 17 babies are stillborn or die within the first four weeks of life. Many parents face difficult dilemmas following an adverse screening or test result. Parents whose baby may face long term difficulties need to cope with ongoing uncertainties.

Caring for parents in these situations is challenging and demanding. This one-day collaborative conference aims to offer health professionals insights, information and guidance to help them provide the best possible care.

Debate, share and exchange experiences

At no other conference will you be able to hear the views and learn from the experiences of such a range of practitioners and parents.
